Subject: Information regarding Communication Tower

Councilors:

I learned in a meeting earlier today that a couple of things will be started this week with regards to the Communication Tower that might result in you being asked questions from citizens.

- Tomorrow 7-3-13 there will be a balloon installed at the proposed site of the tower at the west end of Jefferson Street. The balloon will be flown at the approximate height of the proposed tower (230 ft.) This is part of the Environmental Assessment that is required for the project. Photographs of the balloon will then be taken from numerous locations in the City to determine if the proposed tower will have an adverse impact on the Historic Resources of the City of Winchester.
- On Monday July 8th the Conditional Use Permit application for the communications tower will be filed with the Zoning department. The preliminary schedule will have the CUP coming to the City Council at the August 27th Work Session and the September 10th regular Council meeting.

Please feel free to contact me should you have questions.

Thank you,

Dale Iman
